# GLADIOLUS BULBS

## GREETING

We want to thank our many customers for their liberal patronage in the past. It is our aim to furnish good stock, true to name, at a reasonable price. More than fifty per cent of our orders each year are repeat orders. If we should make any mistakes we shall be glad to rectify them. We are introducing a few seedlings of our own and will have more in the future as worth-while ones are developed. Therefore, we are finding it necessary to reduce our list of other varieties very materially.

## TERMS

Shipped prepaid at these prices. Cash with order. Bulbs will be held for spring shipment if 25 per cent of amount accompanies order, balance before shipment, or C.O.D.

We reserve the right to use sizes No. 2 and No. 3 in case we are sold out in No. 1, and when shipping to Zones 6, 7 and 8, unless specially requested otherwise. 6 of a kind at dozen rate, 25 at 100 rate. 100 rate 6 times the dozen price.

Send for wholesale list if you wish larger quantities.

Complete cultural directions will be enclosed with each order.

## Special Varieties---Our Introductions.

### Description and Rating by Chas. E. F. Gersdorff

**Mrs. J. C. Grossman (K-J.C.G.) \$1.50 ea., \$15. dozen.**  
Introduced by us late in the spring of 1924 at \$5.00 per bulb. Chas. E. F. Gersdorff, in reporting his rating of this variety, says: "There are not many of this type to rate so high." Exhibition 91, Commercial 91, Landscape 95. "It is surely one of the very best Prims on the market." His color description, according to Ridgway's Chart, is: "Grenadine red to lighter throat, bases of lower petals pale orange yellow blending to a midrib of cream color. Pistil cream color, anthers amethyst violet. It is one of the few real 'Selfs'." The clear, bright color and straight, graceful spikes make it ideal for either florist or landscape work. Like most Prims, it is very productive of good, strong bulblets. This is one of Gersdorff's "Super Glads."

**K'S No. 100 Prim (K-J.C.G.) 40c each, \$4.00 dozen.**

Seed sown May 1920, in August, 1921, fifteen months later, from one-half inch bulb grew a spike of sixteen buds, five open at once, four and one-half inches in diameter and a bulb three and one-half inches in diameter, with four strong eyes. Needs deep planting and plenty of room. This is sure to be a winner.

Gersdorff's comment: "The last three are superb, much admired by everyone."

**Silver Sheen (J. C. G.) . . . . . 20c each, \$2.00 dozen.**  
A blend of colors that gives it a chocolate brown effect, overlaid with a silver sheen. Rated 88 for exhibition by the new A. G. S. scale. Color description (Ridgway)—Light coral red medial lines; light coral red overlaid aster purple to form a vandyke red effect, deepest of tips and edges, bases lowers naphthalene yellow with lines blotches of garnet brown, pistil acajou red, anthers dull violet; silver sheen over all, wide open triangular form.
